The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Porzio et al (US 6187351 B1) in view of Cherukuri et al for the reasons set forth in rejecting the claims in the last Office action. The amendments to the claims and the new claims are not seen to influence the conclusion of unpatentability previously set forth.

Porzio et al disclose an encapsulated flavor composition having a glass transition temperature of greater than or equal to 35°C comprising a flavor material encapsulated in a matrix comprising a sugar, maltodextrin (5 to 15 D.E.), starches, food acids, corn syrup solids, and a cellulose (see entire patent, especially claims 1-4, 25, 26, and 63).

The claims differ as to the specific use of hydroxypropyl cellulose.

Cherukuri et al disclose an encapsulated flavor comprising celluloses including hydroxypropyl cellulose.

It would have been obvious to a person of ordinary skill in the art, at the time the invention was made, to use the hydroxypropyl cellulose of Cherukuri et al in that of Porzio et al because the use of celluloses including hydroxypropyl cellulose to encapsulate flavors is conventional in the art. Applicant uses a known encapsulating material to obtain no more than expected results.

Applicant's arguments filed January 14, 2004 have been fully considered but they are not persuasive.

Applicant argues that there is no motivation to combine the references because Cherukuri et al is not directed to a glassy matrix.

In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, both references are directed to the encapsulation of flavors.

Porzio et al clearly teach the use of cellulose materials. Cherukuri et al is cited to teach the conventional use of hydroxypropyl cellulose in encapsulating flavors.

In the absence of a showing to the contrary, Applicant uses art-recognized components for their art-recognized use to obtain expected results.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the

Art Unit: 1761

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
